Miner's Claim Variegated Angel's Trumpet

Brugmansia 'Miner's Claim'

Height: 8 feet

Spread: 5 feet

Sunlight: ○ ◐

Hardiness Zone: 9b

Description:

A heat loving variety that likes warm days and cool nights; large, dangling salmon pink trumpets emerge in summer until fall, over lovely variegated foliage; flowers are only fragrant at night; a stunning indoor accent plant for bright areas

Features & Attributes

Miner's Claim Variegated Angel's Trumpet features showy fragrant salmon trumpet-shaped flowers with creamy white throats hanging below the branches from early summer to mid fall. Its attractive large pointy leaves emerge buttery yellow, turning dark green in color with showy creamy white variegation and tinges of grayish green throughout the year.

This is a multi-stemmed evergreen houseplant with an upright spreading habit of growth. Its wonderfully bold, coarse texture is quite ornamental and should be used to full effect. This plant may benefit from an occasional pruning to look its best.

Planting & Growing

When grown indoors, Miner's Claim Variegated Angel's Trumpet can be expected to grow to be about 8 feet tall at maturity, with a spread of 5 feet. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years. This houseplant will do well in a location that gets either direct or indirect sunlight, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It does best in average to evenly moist soil, but will not tolerate standing water. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It will benefit from a regular feeding with a general-purpose fertilizer with every second or third watering. It is not particular as to soil type or pH; an average potting soil should work just fine. Be warned that parts of this plant are known to be toxic to humans and animals, so special care should be exercised if growing it around children and pets.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.
