Height: 24 inches

Spread: 24 inches

Sunlight: ○ ◐

Hardiness Zone: 3a

Other Names: Bush Cinquefoil, Shrubby Cinquefoil

Description:

A very compact selection with showy golden-yellow flowers from June until frost and fine textured deep green foliage; hardy, tough and adaptable to all conditions, but dislikes wet soils; fairly drought tolerant once established

Ornamental Features

Little Pot Of Gold Potentilla features showy yellow flowers with gold eyes at the ends of the branches from early summer to mid fall. It has forest green deciduous foliage. The small ferny compound leaves do not develop any appreciable fall color.

Landscape Attributes

Little Pot Of Gold Potentilla is a dense multi-stemmed deciduous shrub with a more or less rounded form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a relatively low maintenance shrub, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees and butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Little Pot Of Gold Potentilla is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- General Garden Use
- Container Planting

Planting & Growing

Little Pot Of Gold Potentilla will grow to be about 24 inches tall at maturity, with a spread of 24 inches. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub does best in full sun to partial shade. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. This plant does not require much in the way of fertilizing once established. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selection of a native North American species.

Little Pot Of Gold Potentilla makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. It can be used either as 'filler' or as a 'thriller' in the 'spiller-thriller-filler' container combination, depending on the height and form of the other plants used in the container planting. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
