Height: 10 feet

Spread: 5 feet

Sunlight: ○ ◐

Hardiness Zone: 7b

Other Names: Shrubby Japanese Yew, Buddhist Pine

Description:

This elegant shrub or small tree is ideal as a foundation shrub, garden accent, or courtyard tree; great for urban planting along streets and medians; excellent as a screen or sheared hedge because of its dense, long lived foliage

Ornamental Features

Meta Japanese Yew has attractive dark green evergreen foliage which emerges light green in spring on a dwarf conifer with an upright spreading habit of growth. The glossy narrow leaves are highly ornamental and remain dark green throughout the winter.

Landscape Attributes

Meta Japanese Yew is a multi-stemmed evergreen shrub with an upright spreading habit of growth. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a relatively low maintenance shrub, and can be pruned at anytime. It has no significant negative characteristics.

Meta Japanese Yew is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Meta Japanese Yew will grow to be about 10 feet tall at maturity, with a spread of 5 feet. It has a low canopy, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for 50 years or more.

This shrub does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.
