

Sweet Georgia® Light Green Sweet Potato Vine

Ipomoea batatas 'Sweet Georgia Light Green'

Height: 12 inches

Spread: 30 inches

Sunlight: ☉ ●

Hardiness Zone: (annual)

Description:

A great addition to combination planters and hanging baskets, as well as being an annual groundcover in the landscape; loves heat and humidity, in those conditions it grows very quickly

Features & Attributes

Sweet Georgia Light Green Sweet Potato Vine is primarily valued in the home for its spreading and trailing habit of growth. Its attractive lobed leaves remain light green in color throughout the year.

This is a dense herbaceous houseplant with a trailing habit of growth, eventually spilling over the edges of hanging baskets and containers. Its relatively coarse texture stands it apart from other indoor plants with finer foliage. This plant may benefit from an occasional pruning to look its best.

Planting & Growing

When grown indoors, Sweet Georgia Light Green Sweet Potato Vine can be expected to grow to be about 12 inches tall at maturity, with a spread of 30 inches. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 1 years. This houseplant will do well in a location that gets either direct or indirect sunlight, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It does best in average to evenly moist soil, but will not tolerate standing water. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil type or pH; an average potting soil should work just fine.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.
